University and TAFE Open Days are coming up soon. They are a great way to find out more about courses, collect information, talk to staff and students, and to check out facilities. Year 10-12 students are advised to attend.

HOW TO GET THE MOST OUT OF OPEN DAY VISITS – Don’t wander aimlessly...try the following:

• Allow sufficient time for your visit; two hours or so would be advisable
• Speak to staff about courses which interest you - note your questions beforehand
• Get a student perspective - speak to students studying courses which interest you
• Collect information/brochures
• Ask about industry based-learning (IBL) opportunities; these can assist with gaining employment
• Ask about international study opportunities – a popular option
• Consider transport issues; is the campus accessible from where you live?
• Check the environment where you will study; will you be happy there for three/four years?
• Consider the facilities/clubs offered at your preferred institution
• Consider visiting a rural campus, especially if you think you won’t obtain a high enough ATAR for a metropolitan campus. ATAR’s are often lower and they often offer more personal assistance, accommodation, and a lifestyle which will suit some students.

NOTE: If you plan to apply for a course involving an interview/folio presentation/audition as part of the selection process, attendance is A MUST! You might be asked what you learned at Open Day.

MONASH UNIVERSITY NEWS - PHARMACY AND PHARMACEUTICAL SCIENCE – Monash Parkville campus will hold an ‘Open House’, 10am-3pm, Sun 17 Aug (same day as Melbourne’s Open Day). Pharmacy will also be represented at Monash Clayton’s Open Day, Sun 3 Aug. Info: www.monash.edu/pharm/openhouse.

MEDICINE, NURSING AND HEALTH SCIENCES UPDATE –

• Physiotherapy – as previously stated, the UMAT and ISAT are not required for 2015 entry. An interview is still required and will be offered based on applicant’s academic record.
• **Radiography and Medical Imaging** – an interview has been introduced as an extra requirement for entry to this degree. Applicants will be invited to attend an interview based on their academic performance. The interview will involve 4 MMI (Multiple Mini Interview) stations. NOTE: find out more about radiation oncology careers: [www.acareerinradiationoncology.com.au](http://www.acareerinradiationoncology.com.au).

• **Direct Entry MBBS** – Monash is the only Victorian university offering Year 12 students who aspire to become a doctor the option of applying directly to the B. Medicine and B. Surgery program from school. There are 242 places for domestic students and 65 for internationals.

**ARE THERE STILL JOBS IN JOURNALISM?** Career Practitioners at a conference at Monash Uni, heard about opportunities in journalism. Journalism is **not in decline**; it is newspapers that are in decline; newspapers and journalism are not the same thing. The digital era that is destroying the old business model is opening up opportunities. We are entering an age where we can combine all media to tell our stories. Skills needed include enterprise, independence and resourcefulness. Jobs in media are fragmenting with online opportunities proliferating. Journalists need to: think critically, understand the concepts of evidence and impartial argument, find stories, research, interview, write, edit, know the difference between good/bad writing, and digital skills in content creation and distribution. With the skills of journalism, you are a good fit for jobs in many areas such as PR, communications, speechwriting and producing. NOTE: Journalism can be studied at most universities.

**WHAT ABOUT SURVEYING?** Surveying offers opportunities for those looking for a diverse and varied career. The national demand for surveyors means graduates are more likely to secure jobs in surveying compared with many other professions. Surveyors get to work indoors and outdoors, taking precise measurements using specialised technology, then analysing and interpreting the results. Students interested in maths, geography, physics and science could be suited to this career.

**DEAKIN UNIVERSITY NEWS - BACHELOR OF DESIGN TECHNOLOGY** – There is a trend to increasingly adaptive industries, where manufacturing and product development companies are becoming smaller and adopting more diverse interests and product lines. The industry needs versatile, technologically-minded people with design, project management and organisational skills to drive innovation. Commencing in 2015, Deakin’s B. Design Technology has design and innovation as core focus. Gain design skills for application in technological settings, and an understanding of using technology to enhance design and product development. Graduates will be able to create and design consumer, sports, medical or industrial products. **Where:** Waurn Ponds; **Prerequisite:** English

**BACHELOR OF PLANNING (HONOURS)** – As cities grow, there is increasing demand for planners to manage change. This new Deakin degree brings together disciplines of planning, design, urban studies and society in one degree. **Where:** Geelong (Waterfront); 4 years; **Prerequisite:** English.
